

**Danske Commodities A/S**

Århus, 25. september 2009

**Danske Commodities is the winner of the 2009 gazelle award.**

Here you can read a draft of "Børsens" article from September 25 "Elhandel til tops i hårdt vækstklime".

*Yesterday Danske Commodities from Aarhus, was in the new Theatre in Copenhagen to accept the award as nationwide gazelle winner. The new Theatre scene is currently set for the show Les Miserables but there is nothing miserable, when it comes to growth in Danske Commodities. The company with 34-year-old founder Henry Lind has over the past four years accumulated a growth of 2257 per cent. Danske Commodities' business model is buying electricity cheaply - and then selling it at a higher price. This business model candidates the company for a climate-gazelle, as emphasizes by Børsens chief editor and CEO Leif Beck Fallesen.*
